

## Biosketch for Ryan Hamlin, MD

Hello! My name is Dr. Ryan Hamlin and I am a pediatric anesthesiologist at Children's Hospital & Medical Center in Omaha, Nebraska. I have been in practice since 2014 and strive to provide safe and efficient comprehensive pediatric anesthesia care. I am active in all aspects of perioperative care of pediatric patients and have served in nearly every capacity since I arrived at Children's. More recently I have focused on functioning as a cardiac anesthesiologist for our busy cardiac program. I also have volunteered as a Malignant Hyperthermia Hotline consultant for the Malignant Hyperthermia Association of the United States (MHAUS) since 2016. I enjoy helping others during these rare but very stressful situations. I currently live in Elkhorn, Nebraska with my wife and three children. Outside of medicine, I enjoy spending time with my family, coaching youth sports, and pretending to be a professional chef.
